

TurnKey Internet Adds TurnKeyMail – Next Generation Email and Collaboration Service

FOR IMMEDIATE RELEASE

Albany, NY, September 14, 2010—Web solutions provider TurnKey Internet today announced the launch of TurnKeyMail, a next-generation email and connectivity tool offering Exchange-level mail server features for a fraction of the cost. TurnKeyMail is cloud-enabled and offers cross-platform collaboration while blocking unwanted spam or viruses. Message archiving provides full compliance with SOX and HIPAA regulations, making smart phone compatible TurnKeyMail a necessary and valuable business tool.

TurnKeyMail includes cloud file storage, robust calendaring, full POP/IMAP and SMTP compatibility, follow-up flagging, auto-saved email addresses, linked tasks and more. Collaborative features include Microsoft Exchange Active Synchron, enhanced Outlook synchronization, easy mailbox migration and advanced anti-spam pattern matching technology. TurnKey Mail can be accessed from any smart phone, PC or Mac.

“We are particularly proud of TurnKeyMail’s Exchange-level features, and, as a business ourselves, we know the importance of SOX and HIPAA compliance,” said Adam Wills, President and CEO of TurnKey Internet. “Whether you want to synchronize mobile devices, facilitate employee collaboration or are simply looking for a rock-solid mail server, TurnKeyMail is the smart business solution.”

TurnKeyMail is part of TurnKey Internet’s new breed of TurnKey business solutions, arriving on the heels of TurnKey Vault NAS, their new cloud storage solution, and TurnKey Newsletter, their new web-based email marketing software.
