TurnKey Internet Announces TurnKey Vault – Secure Online Backup Solution

FOR IMMEDIATE RELEASE

Albany, NY, November 3, 2010—Web solutions provider TurnKey Internet today announced the launch of [TurnKey Vault](), a secure online backup solution for businesses and individuals. TurnKey Vault is fully automated, storing backups securely in TurnKey Internet's own data center. Backups require a private password for decryption, ensuring maximum data privacy.

TurnKey Vault uses military-grade encryption when sending information over the Internet, with software that offers rapid data restores. TurnKey Vault features an easy-to-use interface for quick, straightforward customization.

"I can't emphasize enough the importance of comprehensive backups to a business. When you are building your clientele, losing your financial records, creative projects, emails and contacts means losing your shirt," said Adam Wills, president and CEO of TurnKey Internet. "Protecting your data means protecting your future, and we are pleased to be able to provide this important service to our clients."

With 2GB of backup space free for life, clients can use TurnKey Vault right away, with no risk or commitment. TurnKey Vault is compatible with any PC and installs in seconds. This complete business solution is the latest release in TurnKey Internet's SaaS Business Bundle which includes their next generation email and connectivity tool, TurnKeyMail; their email marketing software, TurnKey Newsletter; and TurnKey Website, their next generation website builder service.
